

MANYA MISHRA

Aspiring Data Analyst | Data Analysis | Python | SQL | Power BI | Microsoft Excel

9554651482 | manyamishra82@gmail.com | www.linkedin.com/in/manyamishra-2986a324b | <https://github.com/Manya-Mishra>

Summary

MCA student specializing in AI & ML with hands-on practical experience in SQL, Python, Power BI, Excel, and data analytics. Skilled in data cleaning, exploratory data analysis (EDA), dashboard development, visualization, and machine learning fundamentals using tools like Pandas and NumPy. Developed analytics projects in customer churn and e-commerce intelligence to derive actionable insights. Seeking a Data Analyst opportunity to apply analytical and problem-solving skills in business decision-making.

Skills

Languages & Libraries: Python, SQL, R (Basics), Pandas, NumPy, Scikit-learn

Data Analytics: Data Cleaning, Data Wrangling, Exploratory Data Analysis (EDA), Data Visualization, Statistical Analysis, Anomaly Detection, Quantitative Analysis, Dashboard Development

Statistics & Machine Learning: Machine Learning, Descriptive Statistics, Probability, Regression, Classification, Clustering

Spreadsheet Tools: MS Excel (Pivot Tables, VLOOKUP, Power Query)

Data Visualization: Power BI, Tableau, Matplotlib, Seaborn

Tools: Git, GitHub, Jupyter Notebook, Streamlit, Google Sheets, Google Docs, ChatGPT, Claude

Database Management Systems: MySQL

Soft Skills: Analytical Thinking, Problem Solving, Critical Thinking, Team Collaboration, Documentation Skills, Communication Skills, Attention to Detail, Adaptability

Projects

Pizza Sales Analysis | SQL, Power BI, Microsoft Excel | [Github](#)

- Analyzed pizza sales data to identify customer ordering patterns, revenue trends, and sales performance metrics.
- Utilized SQL queries involving JOINS, GROUP BY, aggregate functions, subqueries to perform business-oriented data analysis.
- Built an interactive Power BI dashboard to visualize key performance indicators and business insights.
- Identified top-selling products, peak sales periods, category-wise revenue contributions to support data-driven recommendations.
- Applied quantitative analysis techniques to generate actionable business insights for sales optimization.

Customer Churn Analysis | Python, Power BI, Pandas | [Github](#)

- Analyzed 7,000+ telecom customer records to identify churn behavior, retention risks, and customer segmentation patterns.
- Performed data cleaning, preprocessing, and EDA using Python and Pandas improving consistency and analytical accuracy.
- Built an interactive Power BI dashboard to visualize churn trends and customer segmentation.
- Applied statistical analysis and visualization techniques to uncover key factors influencing customer attrition and service usage.
- Utilized GenAI tools and prompt engineering for analytics, query optimization, insight generation, and workflow enhancement.

Air Quality Index (AQI) Prediction System | Python, XGBoost, Scikit-Learn, Streamlit, Pandas | [Github](#)

- Developed an end-to-end ML system to predict AQI using environmental pollutant data from 25+ Indian cities.
- Performed data cleaning, feature engineering, label encoding, and exploratory data analysis on 29,000+ records.
- Trained, compared Linear Regression, and XGBoost models, selecting XGBoost based on evaluation metrics (MAE, RMSE, R²).
- Built and deploy an interactive Streamlit featuring AQI prediction, categorization, trend visualization, feature importance analysis.

Virtual Experience

Deloitte Australia | Data Analytics Job Simulation (Forage)

(Jan 2026 – Mar 2026)

- Performed data analysis using Microsoft Excel (Advanced Functions) to identify operational trends and reporting insights.
- Built interactive Tableau dashboards to visualize customer behavior, and performance metrics.
- Created business-oriented analytical reports and dashboards to support data-driven recommendations.

Tata Group | GenAi Powered Data Analytics Job Simulation (Forage)

(Aug 2025 – Nov 2025)

- Performed exploratory data analysis, business risk analysis using financial datasets to identify customer risk & business trends.
- Designed AI-assisted analytics strategies focused on automation, operational efficiency, and data-driven decision-making.
- Generated actionable insights to support customer risk assessment and strategic decision making.

Education

Galgotias University, Greater Noida, Uttar Pradesh

Master of Computer Applications (AI & ML) | CGPA: 9.65 | Expected 2027

Shri Ramswaroop Memorial University, Barabanki, Uttar Pradesh

Bachelor of Computer Applications | CGPA: 8.01 | 2025

Certifications

Python Certification — [HackerRank](#)

SQL Certification — [HackerRank](#)

Database Management System Certification — [Great Learning](#)

Generative AI Foundations — [AWS Academy](#)

Machine Learning Foundations — [AWS Academy](#)
